digitally?
22:49:35 From Penny (JC) Tilton : Yes!!
22:49:39 From Pamela C : I was reciting the biblical creation story in a

23:15:54 From Deb Matz : or the fda. one of those pos agencies

23:17:21 From Deb Matz : they pulled the same shit with the healthy air levels. anything over 25% was bad. now it is double that

23:17:34 From Nancy Lalonde : That's why they tried to shut down all the stories and chatter about Fukishima, because people were measuring way beyond what it should have been seen and initially it was too early for the fallout, yet people were getting measurements.

23:17:41 From JulesRusz â€¢ : Is it the depletion of the magnetosphere increasing the radiation? We have discussed this a lot.

23:17:41 From GAIL : we have phones smart tech smart metres etc that are giving off rad at ground level its bound to be higher

23:29:23 From Star Walker : :)

23:30:59 From Deb Matz : we had electrical surges in a house we lived in during the late 80s, early 90s. Fried my giant kiln. For some reason, the fire didn't go past the plug. Maybe the safety thingie I had on the house electrical box stopped it when the thingie flipped

23:31:44 From Deb Matz : I only had to replace the cord. weird

23:32:29 From Nancy Lalonde : yessss
23:34:59 From Deb Matz : my husband is still getting actual arcs of electricity when he touches stuff, even plastic. Kissies are... interesting when he is "charged"

23:50:57 From Jaqui : Won't that bring an ice age?
23:55:06 From Nancy Lalonde : That would support Dani's hypothesis about friction.
23:55:17 From Nancy Lalonde : with the mantle shifting or wobbling
23:57:59 From Deb Matz : Hope it works Ben ;D
