'Library of the Great Silence' invites E.T. to share long-term survival strategies

Intelligent aliens will soon have a space here on Earth where they can share how they made it through their technological adolescence....

...Keats wants the library to be universally accessible, and we can't assume that beings from across the universe will understand any languages spoken here on Earth. So the facility will house not books but artifacts of transition — stuff like handaxes, fossils of extinct species and shards of trinitite, the greenish glass forged by the intense heat of the first-ever atomic bomb blast, at New Mexico's Trinity Site in July 1945.

If all goes according to plan, the collection will eventually become an interstellar research center, incorporating ideas sent in by creatures across the cosmos.

"Earth has shifted"-Inuit elders issue warning to NASA and the world

[Share](#) [Tweet](#) [+](#)

Voltar Ondrusek, Pixdaus

Inuit elders say the earth has shifted, tilted or as they put it, "wobbled" to the north and they all agree "Their sky has changed!" They say it is becoming increasingly hard to predict the weather, something that is a must in the Arctic.

**Earth has been knocked off its axis over the last 25 years,
changing the locations of the north and south poles**

...because of "melting ice" due to "Global Warming"

Buhahahaha!!!!

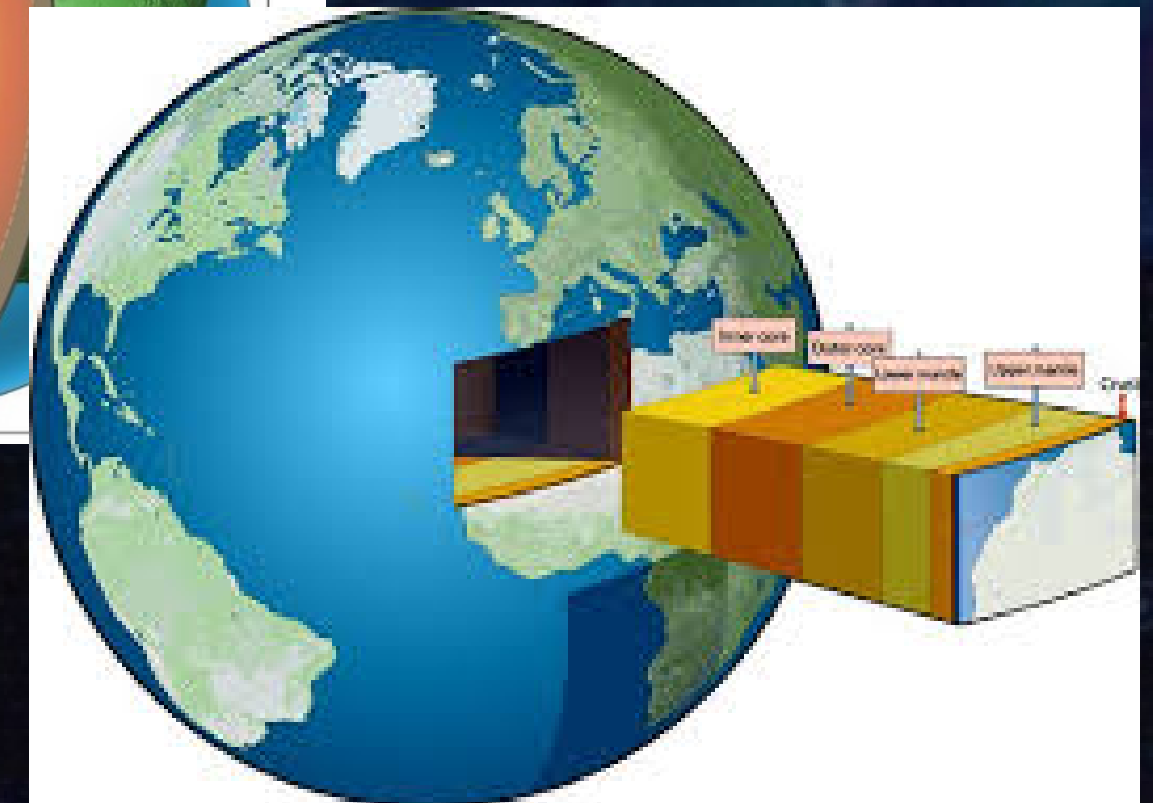

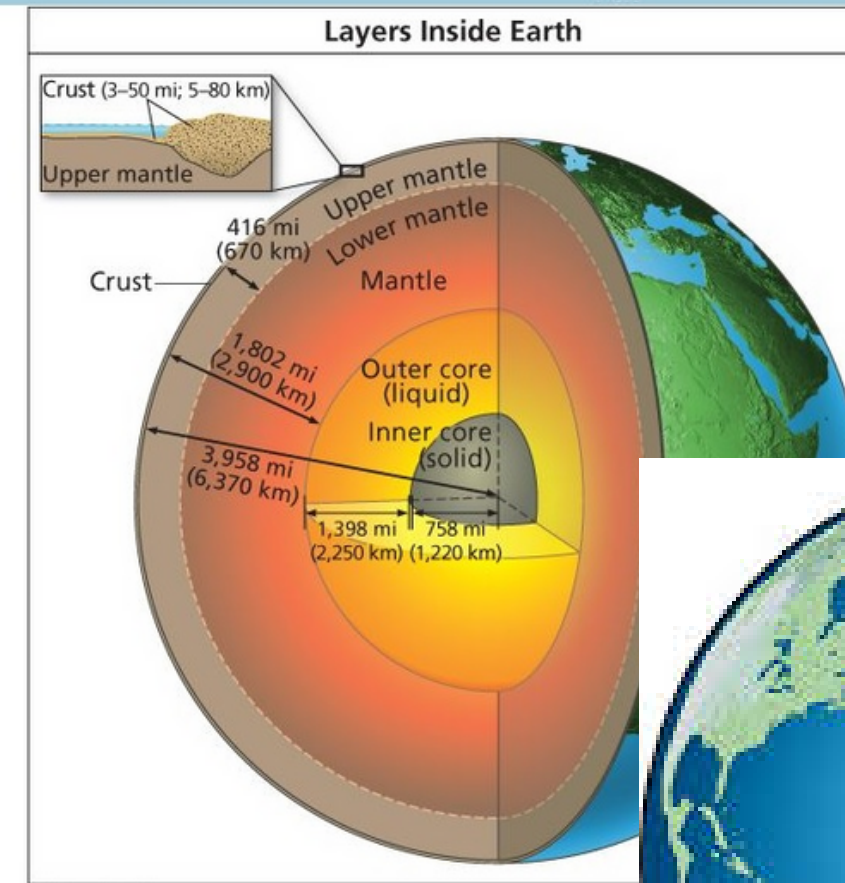

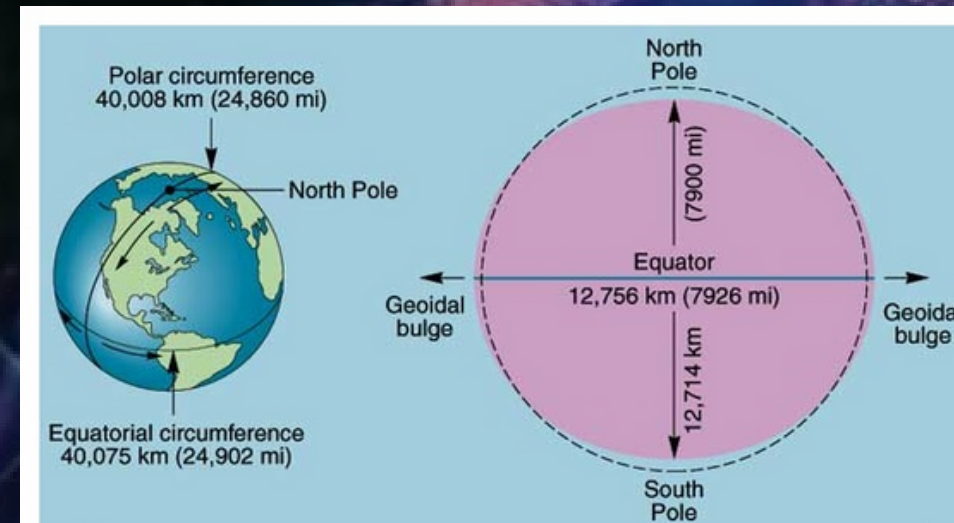

...water that was frozen in glaciers in the planet's polar regions melts and joins the ocean, the weight of that water gets spread across a different area. That redistribution, according to the new study, is the main driver of the polar drift scientists have observed in the last few decades.

10 feet per second

HUMAN

Farts have been clocked at a speed of 10 **feet per second**. A person produces about half a liter of farts a day. Women fart as much as men. The gas that makes your farts stink is hydrogen sulfide. 19 Mar 2008

$10 \times 60 \text{ seconds} = 600 \text{ feet per minute}$

$600 \times 60 \text{ minutes} = 36,000 \text{ feet per hour}$

$5280 \text{ feet} = 1 \text{ mile}$

$36,000 \text{ feet} = 6.8181 \text{ miles an hour}$

...or 10.9726 kilometers an hour in real measurements

Your basic fart generates **0.2 newtons**.

HUMAN

Definition. One **newton** is the force needed to accelerate one kilogram of mass at the rate of one metre per second squared in the direction of the applied force. The **units** "metre per second squared" can be understood as change in velocity per time, i.e. an increase of velocity by 1 metre per second every second.

TIMES THAT BY 1.5 BILLION COWS

$0.2 \text{ newtons} \times 1.5 \text{ billion cows} = 300,000,000$

Newtons of force
